DIRECTORY VETERINARY ANATOMISTS OF INDIA 2015

PREFACE

I feel highly delighted in expressing my views about the new edition of the Directory of Veterinary Anatomists of India. A document having addresses and phone numbers of all Veterinary Anatomists was not available up to 1998. First edition of the Directory was published by Indian Association of Veterinary Anatomists (IAVA) in September 1999 which enhanced good relationship and scientific co-operation among anatomists and other scientists across the country. The revised edition of the Directory was awaited since long time as the earlier version was published in October 2002 in which systematic arrangement of brief bio-data of members along with their achievements were documented. Actually, idea to have a new edition of the Directory was generated during the General Body Meeting of Mathura Convention in 2011 when the Executive Committee of IAVA noticed that many young anatomists were individually collecting the phone numbers, e-mails and addresses of new and retired members. Initially it was decided that the next issue of the Directory will be in the hands of Anatomists during Bikaner convention for which members were asked to submit the information on the prescribed proforma. The members were again requested to submit the information in Thrissur, 2012. But due to incomplete information the work could not be completed in the said period. At Bikaner convention, the matter was discussed with Dr. Pawan Kumar, Chief Executive Editor of the Journal, who became ready to publish and print the next issue of the Directory.

For preparation of this document, the information was collected from each college/institute and was compiled in the form of Directory. This issue of Directory provides a comprehensive list of Veterinary Anatomists residing at different zones of the country. It includes the addresses, phone numbers and e-mails of almost all working as well as retired Veterinary Anatomists. All the colleges and institutes within each state, where Veterinary Anatomists are working, are arranged alphabetically in the Directory. The names of the retired anatomists are also given in alphabetic manner. In my opinion, this directory will serve as a major tool for sharing the information and idea regarding the research work and other scientific matters among the anatomists and other scientists engaged in various fields of life sciences.

I am thankful to all members of the Executive Committee especially to Dr. Pawan Kumar who took pains and devoted his time for the preparation of the Directory.

Ajay Prakash
Secretary, IAVA

FOREWORD

This is a matter of great pleasure that the updated issue of Directory of Indian Association of Veterinary Anatomists is published. In series, this is the third edition which is long awaited. There was always a need to update the details of all the Veterinary Anatomists working in different institutes along with those who have served earlier. The contents of the Directory include present members of the Executive Committee, a brief history of IAVA, office bearers from the time of inception, venues of Annual Convention and Symposium, Eminent Veterinary Anatomists and details of faculty members working in different colleges of different states. The photograph of concerned teacher has been included for the first time. In addition to phone numbers, e mails have been incorporated which is a step towards e-governance. This will not only facilitate better communication amongst anatomists but also provides personal and official information about anatomists for the purposes of selection of experts, external examiners etc. All the contents of the Directory have been compiled meticulously and lot of efforts have been made for formatting and the cover page design. From future point of perspective, this Directory will be a great tool not only for updating the information next time but will also remind about the present anatomists to the budding anatomists of that time.

Dr. Pawan Kumar, Chief Executive Editor deserves special appreciation who accepted this assignment in spite of his professional limitations and put lot of efforts to publish this document. He has taken one more step ahead to put this Directory online at website which will be a way to go to locate any of these members by concerned persons across the globe.

INDIAN ASSOCIATION OF VETERINARY ANATOMISTS HISTORY

In 1981, during a National Symposium on Developmental Biology at Department of Zoology, University of Pune, a historic decision to formulate a National Body of Veterinary Anatomists was taken by the following Veterinary Anatomists:

1. Dr. A. M. Srivastava, Jabalpur (Ad-hoc President)
2. Dr. R. V. Pandit, Nagpur (Ad-hoc Secretary)
3. Dr. B. G. Panchmukhi, Gujarat
4. Dr. Kalyan Singh Deora, Bikaner
5. Dr. P. A. Omar, Kerala

These five Veterinary Anatomists formed the Indian Association of Veterinary Anatomists (IAVA). Architecture of the constitution of IAVA was prepared by Dr. R. V. Pandit, Nagpur and he also got this association registered in 1983 at Nagpur.

First convention of IAVA was held at Madras Veterinary College, (TN) in the year 1983. The College of Veterinary Sciences, HAU, Hisar organized the convention of IAVA twice at a time when the body was short of financial support and had scanty members. Then staff at College of Veterinary Sciences, Hisar not only successfully organized the conventions but also provided financial support and added more members to the Association. Thus going through ups and downs, IAVA is a now a self sufficient body having its members across the globe.

The name of the Association is "Indian Association of Veterinary Anatomists" or "IAVA".

Aims and Objectives of the Association:

- a) Promotion and advancement of Veterinary Anatomy, including all its branches such as Gross Anatomy, Histology, Cytology, Histochemistry, Developmental Anatomy, Neuroanatomy, Applied and Surgical Anatomy etc.; as it relates to all vertebrates, with special emphasis on animals of Veterinary (domestic) and wild life importance.
- b) Encouragement and stimulation to research, education, extension, popularization of Veterinary Anatomy and to promote better understanding of biological structure of organisms stated under a) above.
- c) Establishment of high and uniform standards of Veterinary Anatomy at proper position in educational programmes at all places of teaching and research of Veterinary and Animal Sciences in India. To achieve this, to recommend to all teaching, research and extension institutions, on all appropriate matters concerning Anatomy at all levels.
- d) Recommend and ensure allocation of a certain percentage of posts, funds and facilities specifically for teaching and research in Veterinary Anatomy at all Universities and Colleges.
- e) Encouragement to fraternity, mutual co-operation and scientific exchange amongst Veterinary Anatomists by ways of publications, symposia, seminars, workshops, exchange visits, meetings etc.
- f) Protection of professional rights and interests.
